Cote for a few days, returned
home Wednesday morning.

contract between Carmangay
and Alderside, is offering \$10 a
month for teamsters and scrape-
haulers, and states he is not
able to get enough men.

Messrs. Needham and Baker

England of this town with a
fine site on their townsite for a
Church and Vicarage consisting
of three corner lots in Block 25.

The contract for building the

which Mr. Loucks will handle
at his planning mill.

The baseball match at Whita

and Bow Island resulted in a
win for the former, the score
being 7-8. The game that was

joyable affair, the music, all
home talent, being excellent.

ager.

We received this week from
Ottawa several valuable bulle-
tins on various matters con-
nected with agriculture, and any
one of which can be obtained
upon application to the Minis-
ter of Agriculture, Ottawa. The
subjects treated are "Weeds,"
"Alkali," "Soils," "The rape
plant," "Rutabaga," "Beacon pig in
Canada," "Alfalfa or lucerne,"
"The grades of wheat," "Straw-
berry culture," "The flax plant,"
"Growing and using corn for
ensilage," and "Results obtained
in 1907 on the Dominion ex-
perimental farms." All of the
above may be seen at the office
of the "Review."

T. W. Dyer made a trip west
yesterday.

E. L. Kingsbury, of Lucky
Strike, has been gazetted a com-
missioner to take affidavits.

Mr. McAlpin our station
agent, discovered a dog yester-
day morning tied up in a freight
car without food or water.
What reason the person had
for tying the animal in a car
we do not know, but it is quite
evident it was not a humane
one.

C. P. Houghlin opened this
week on Broadway his barber
shop and pool room. The es-
tablishment is, without doubt
one of the finest and best equip-
ped in Southern Alberta. There
are two hydraulic chairs, a
shoe-polishing chair, and a
fountain stand, of the very best
manufacture, in the barber
shop, and the pool room is fitted
with four tables, around which
runs a raised platform lined
with chairs. The entire room
is tastefully decorated with pic-
tures, etc., and makes a pleas-
ing addition to the fine struc-
tures we already have in Bow
Island.

**HOMESTEADERS

FOR WORK

THE REVIEW OFFICE is well supplied with all kinds of types, and is prepared to execute at the shortest notice any job work from the distasteful of cards to full sheet posters.

We announce this week the opening of two more farms in the Bow Island district, one of which is under the name of Jarman School District No. 2236 and the other Fertile Plains District No. 2241.

The erection of these school districts heralds still further the remarkable expansion and development that is going on around us, and with this development the increased desire for school accommodation with better educational facilities.

Western Canada teems with instances of the remarkable progress made by communities where an intelligent and forward policy is formulated by its residents, and where sufficient energy is generated to carry reforms into effect. Nowhere, however, is the go-ahead spirit more in evidence than around Bow Island, where the excellent class of settlers that reside therein have executed reforms and made progress in a manner without parallel even in Western Canada.

Is it then surprising that we

develop such a big feeling of optimism here, where every-thing is conducive to its growth.

LURE FOR GOLD.

Authentic reports in regard to the gold rush at Hudson Bay Junction are to the effect that forty claims have been recorded. The discoverers of the gold were E. Marcotte and J. McGillivray, of the Junction, who were prospecting eighteen miles northeast of the place. One night they built their fire on an area of sand and they found in the morning that the action of the fire had changed the color of the sand and that there were particles of gold showing in it. They sent samples to Winnipeg and the report back was that it averaged \$50 to the ton.

This started the rush from the Junction to the location which is on the banks of what is called the Over-the-hill river. There is considerable sand there and the theory is that the gold has been washed down from the Pasqua mountains which are visible from this point. The place is easy of access and is just six miles from Pasqua Mission. There has for some time been an impression that there is gold in the Pasqua mountains, which are of glacial origin though they have never been prospected by mineral men.

FOSTER'S FORECAST

Washington, D.C., August 8. My last bulletin gave forecasts of disturbances to cross continent To 11, warm waves 5 to 10, and wave 9 to 15. The specific feature of this disturbance will be numerous showers where rain will be much needed. When these rains fall the crop crop will make a half crop or less, and if the drought section continues large, as it had seemed to promise, the loss to the crop crop will be a calamity.

But I am counting on sufficient rains before August 10 to bring much relief, and revive the hopes of a fair average corn crop for 1910. If these rains come as expected we will see a great decline in all grain prices. So much is now depending on the corn crop that should the drought continue all grains will be in greater demand, while a fair corn crop will insure moderate prices. Therefore, while prices are up is a good time to sell if you must sell before mid-winter.

Third disturbance of August will reach Pacific coast about 11, cross Pacific slope by close of 12, great central valleys 13 to 15, eastern sections 16. Warm waves will cross Pacific slope about 11, great central valleys 13, eastern sections 15. Cool wave will cross Pacific slope about 14, great central valleys 16, eastern sections 18.

This disturbance will bring hot weather again, and where good showers have fallen the previous week the growing weather for corn and spring wheat will be assured. Good rains are expected in the lower Missouri valleys and, from Burlington, Iowa to New Orleans during the week ending on August 8. Some good rains also in the Northwest spring wheat country and some other parts of the cotton belt.

The hope of cotton, corn, northern spring wheat and fall pastures lies in amount of rain that may fall in these sections during the seven days ending on August 8.

I expect severe weather near Aug. 11, as noted on my monthly weather charts, but indications are that it will develop into heat. But the heat will not long continue. With the exception of the two hot waves near Aug. 1 and 14, the month will average cooler than usual.

The cotton crop does not seem to promise well during August. Too much rain near the Mississippi river and too dry in Texas, Georgia, Alabama, Florida and Cuba.

The year 1911 will be somewhat noted for tornadoes. From April 22 to May 7 will be a very dangerous period, and it will be well to have all tornado eddies in good repair and warn school teachers to be on the alert for twisters, particularly in the great central valleys.

During first half of November, 1910, will occur some of the greatest storms of the year, and killing frosts will be carried to extreme southern parts of the cotton belt.
